

AB 617 Community Air Protection Program
Annual Progress Reports for Community Emissions Reduction Programs
Data Collection Template

Date: December 15, 2020

Air District:	Bay Area Air Quality Management District
Community Name:	West Oakland

Reporting Requirement: Assembly Bill (AB) 617 requires that air districts prepare an annual report for each community emissions reduction program.¹

Data Collection: This template is designed to collect the information that is needed to create the required annual reports and is not intended to act as a substitute for the annual reports. After the data are collected, it is expected that air districts will work with their community steering committees to compile the information into their own user-friendly format(s) that reflects community concerns and summarizes progress, challenges, and next steps. California Air Resources Board (CARB) staff will compile data statewide to provide an overall update to CARB's Governing Board and the public.

This data collection template includes: the metrics defined in each community emissions reduction program; action items from CARB Governing Board Resolutions and Staff Reports; and the minimum requirements listed in CARB's Community Air Protection Blueprint.² CARB staff will provide the relevant information on CARB strategies and associated emissions reduction progress for the annual reports. To support transparency, all information will be publicly available.

Due Date for Public Release: CARB's Community Air Protection Blueprint states that annual progress reports must be made available to the public no later than October 1 of each year. Air districts must post the reports on their webpage, issue a public notification that the report has been released, and then present the report to the district board at a public hearing to discuss the contents.

District Staff, please provide the following information for your OVERALL community emissions reduction program³

- Section A: Qualitative progress assessment and status updates for interim milestones identified by the CARB Governing Board; and Quantitative summary of progress

Also, please fill in the attached spreadsheet to provide an update on each strategy in your community emissions reduction program

¹ Assembly Bill 617, Garcia, C., Chapter 136, Statutes of 2017; codified in California Health and Safety Code section 44391.2(c)(7) which states that each district "...shall prepare an annual report summarizing the results and actions taken to further reduce emissions, pursuant to the community emissions reduction program..."

² California Air Resources Board, "Community Air Protection Blueprint", October 2018, Appendix C, pages C-38 to C-40, available at: <https://ww2.arb.ca.gov/our-work/programs/community-air-protection-program/community-air-protection-blueprint>

³ Bay Area Air Quality Management District, "Owning Our Air: The West Oakland Community Action Plan" (i.e., West Oakland Action Plan), October 2 2019, available at: <https://www.baaqmd.gov/community-health/community-health-protection-program/west-oakland-community-action-plan>.

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

- Section B: Status update for each strategy (attach spreadsheet)

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

- 1) Provide a *qualitative* progress assessment. Briefly describe the progress made and provide a status update for each of the following items:

[Ref. Blueprint, page C-39, C-40]

West Oakland Environmental Indicators Project (WOEIP) and the Bay Area Air Quality Management District (Air District) together are the Co-leads of Owing Our Air: The West Oakland Community Action Plan (Owing Our Air or the Plan). The Co-leads are working with the Community Steering Committee, which is comprised of community members and local agency staff to guide implementation of the Plan. Since adoption of the Plan on October 2, 2019 by the BAAQMD, the Co-leads and the Steering Committee have completed the following tasks described below:

- **Community Engagement.**

The Co-leads continued planning and holding monthly Steering Committee meetings and transitioning to remote Zoom meetings in April 2020 in response to the COVID-19 pandemic. The Steering Committee implemented a Subcommittee structure for further study and to advance the Plan's partner strategies, i.e., strategies that require action(s) by an agency other than the Air District or CARB. This Subcommittee approach has allowed for smaller group meetings which are necessary to dig into individual strategies for deeper discussion. The Subcommittees are also helping meet the Co-leads goal of nurturing leadership within the Steering Committee as each Subcommittee is led by a community and an agency Co-chair.

The Co-leads hired a West Oakland based multi-media company, Diff Works, to create videos and to create a slide deck to document Owing Our Air's first year of implementation. The Co-leads also funded youth interns from the Rose Foundation to create a video that expressed a youth perspective on air quality issues. These materials will function as both community-friendly documentation of the work accomplished so far and create interest to encourage new community members to engage in Plan implementation.

- **Enforcement.**

The Co-leads and Steering Committee worked with Air District Compliance & Enforcement staff to implement the following enforcement actions identified in Owing Our Air:

Inspections, Violations and Complaints

While Covid-19 poses challenges, staff have continued to enforce Air District rules and regulations to the best extent feasible. The following table provides an overview of the enforcement efforts in 2019 and the first half of 2020; representing approximately half of a three-year reporting period:

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

Enforcement Action	Jan-Dec 2019	Jan-Aug 2020	Totals for 2019 and 2020
Source Inspections	93	74	167
Notices of Violations	13	11	24
Air Quality Complaints	44	52	96

Stop Burning in Our Community

Air District Compliance & Enforcement staff worked with the Co-leads and Steering Committee members over the summer of 2020 to develop the *Stop Burning in Our Community* [brochure](#) and [poster](#) to discourage indoor and outdoor burning, a source of air pollution and odor in West Oakland identified by the Steering Committee. The materials highlight the negative health impacts of burning, inform the public of Spare the Air Alerts that ban wood burning, provide information on the Air District complaint hotline and how to check before burning to comply with Air District regulations. The brochure and poster also help inform the public that illegal burning can result in a Notice of Violation and encourages community members to heat their homes with clean and efficient heating devices.

Air Quality Complaint Policy Update

The Air District hosted five public workshops (San Francisco, Oakland, Santa Rosa, San Jose and Martinez) in late 2019 and early 2020 to solicit public comments and suggestions to improve the existing Air Quality Complaint Guidelines. For those who could not attend a workshop, the Air District posted an online [video of the presentation](#). The public comment period closed February 20, 2020, and a [summary of comments](#) is posted online. In addition, there are several other efforts underway to help the public understand the Air Quality Complaint Program, including:

- Development of a new online Air Quality Complaint Reporting System to improve the complaint reporting process,
- Updates to information on the Air Quality Complaint webpage and Complaint brochure, and
- Production of short videos to provide an overview of the complaint investigation process.

Collectively, these enhancements will help address community concerns over confidentiality, equity, language interpretation needs for non-English speakers, and provide clarity and transparency to our investigation and enforcement processes.

Enhancing Enforcement Referrals

In addition, Air District staff are improving how complaint referrals are handled and processed internally. To ensure compliance concerns are promptly addressed and shared with other enforcement agencies, the Air District is developing guidance documentation for staff. This includes a general overview of the public regulatory

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

agency with authority and contact information for specific questions and/or registering a complaint. This information will help Air District staff serve the public efficiently when other regulatory agencies have jurisdiction over a complaint issue.

- **Metrics for Tracking Progress.**

Since January 2020, Steering Committee Subcommittees have met to study the Plan’s partner-led strategies through an equity lens. This work would not be possible without the generous partnership of the City of Oakland’s Department of Race and Equity. The Department has provided training and support to the Subcommittees and Steering Committee. This guidance has allowed the Subcommittees to begin to assess the equity implications of all partner strategies and determine what data and outcome-oriented metrics should be tracked for each implemented strategy. Guiding equity questions considered by the Subcommittees include:

1. What is the intended racial equity outcome of the strategy, (who might benefit)?
2. Are there unintended consequences of the strategy (who might be burdened)?
3. How will we measure our success in reaching the racial equity outcome of the strategy?

Due to the short time frame available to develop the Plan, equity was not specifically considered before adoption in October 2019. As the Plan seeks to address inequities and environmental injustices, the equity focus during implementation is critical for Plan success. As each strategy is evaluated for its equity implications specific outcome-oriented metrics will be developed along with identification of the data types/sources to measure those outcomes.

Beyond the specific equity metrics being developed please note Air District’s technical staff continues to work with CARB’s inventory team on the methodology and data, so that we can be consistent with CARB inventory updates as described below under “Board-Directed Action #6.”

Please also see the attached Annual Progress Report Data Collection Template sheet “6. District Metrics” regarding meetings, inspection actions, funds spent, and emission reductions.

- **Implementation Schedule.**

Of the 101 Strategies listed on Sheet “5. District Strategies”, the Co-leads and Steering Committee have:

- “Fully implemented” two strategies,
- “Mostly implemented” two strategies, and
- “Have begun implementing” 68 strategies.

Of the remaining 30 strategies, 20 are CARB strategies and 10 have not been started. Of the strategies not yet initiated, the Plan did not anticipate work to be

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

started in year 2020. The Co-leads believe that we are on target to meet Plan milestones. There are no changes to the implementation schedule presented in *Owning Our Air* (see Table 6-4, page 6-20 of Chapter 6.)

Please also see the attached Annual Progress Report Data Collection Template Sheet “5. District Strategies” for specifics on Strategy implementation actions, and Sheet “6. District Metrics” for details regarding meetings, inspection actions, funds spent, and emission reductions.

- **Data Analysis.**

The equity analysis described above helped identify the need for additional socioeconomic data on West Oakland’s residents, businesses, and employee population. The Co-leads are working with the City of Oakland to gather these data so that the equity implications of strategy implementation are better understood.

Also note that the Air District’s technical staff continues working with CARB’s inventory team on the methodology and data, so that we can keep consistency with CARB inventory updates, as described below under “Board-Directed Action #6.”

- **Strategy Development.**

See above Metrics for Tracking Progress for information about the equity work on Plan Strategies. See also Annual Progress Report Data Collection Template Sheet “5. District Strategies” for narrative information entered in columns F, AC, AI, and AJ for each strategy.

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

- 2) Highlight any “lessons learned” that can be used to support communities with similar sources and air quality challenges. *[Ref. Blueprint, page C-39]*

continued on next page

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

The Co-leads believe that *Owning Our Air* offers lessons that can be applied in other communities. These lessons point to the importance of building trust in the community and with community-based organizations, developing an equal partnership with a community-based organization(s), and developing multi-agency support for the plan and plan development process. There are no short-cuts to developing trust, which comes from doing the work together over a long period of time and taking the time to address and resolve conflicts as they arise.

Owning Our Air is built on the trust developed between WOEIP, and the Air District over 16 years working together. Examples of this work include the Community Air Risk Evaluation Program (CARE), which laid the groundwork for *Owning Our Air*. Since that time, WOEIP and the Air District have worked together to better understand pollution sources in West Oakland, the disparate health impacts on the community, and strategies to address these negative outcomes, through the West Oakland Truck Survey, and mutual engagement on plans including the Port of Oakland's Seaport Air Quality 2020 and Beyond Plan.

WOEIP's deep history in West Oakland attracted residents and community-based organizations to the Steering Committee. The Steering Committee, comprised of residents, interested community members, business leaders, and local government agency staff, met monthly to guide the process of plan development and continues to meet to implement the Plan. Steering Committee members and the public contribute the deep local knowledge of West Oakland necessary for the Plan to be successful.

The Steering Committee also built technical knowledge, by learning about existing and ongoing air quality studies, air quality modeling and measuring, health data available for West Oakland and other communities in Alameda County, existing programs, enforcement, and agency responsibilities. In other words, during the Steering Committee process there is an equal exchange of expertise between community members and government agencies.

From the beginning of Plan development, the Co-leads have worked with and sought commitment to *Owning Our Air* from local agencies. Again, this work builds on long-standing relationships between Co-leads and the City, Port, and Alameda County, for example. The Plan kick-off in July 2018 was at Oakland City Hall and speakers included the Mayor of Oakland, the President of the Board of Port Commissioners, and a Councilmember for the City of Oakland. These political endorsements of the process and Plan helped generate interest and attention in *Owning Our Air*. The Town Hall meeting to introduce the draft Plan to the community in August 2019 also resulted in great community turnout and political support.

Finally, *Owning Our Air* builds on the community engagement and planning work completed by local agency partners. For example, it incorporates strategies from the West Oakland Specific Plan, the City's bicycle and pedestrian plans, and the joint City and Port West Oakland Truck Management Plan. Thus, *Owning Our Air* offers support to work that our agency partners have already committed to doing.

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

3) The community emissions reduction program will have included a community profile. Describe any community profile updates, such as the following information, if applicable: *[Ref. Blueprint, page C-39]*

3a) Describe changes in community attributes (e.g., revised socioeconomic data).

No changes in socioeconomic data or community attributes to report.

3b) List any new community attributes that have been identified (e.g., new local public health indicators).

No new community attributes to report.

4) In its oversight role, the CARB Governing Board may identify interim implementation milestones, either during its initial consideration of the community emissions reduction program for approval, or as discussed in any subsequent CARB Governing Board meetings. Provided below are action items specified during CARB’s Board Meeting in December 2019.⁴ *[Ref. Blueprint, page C-40]*

Please use the form below or provide an attachment that describes updates and progress towards the following interim implementation milestones:

Action Items in CARB Board Resolution 19-29 and CARB Staff Report

The Board hereby directs the District to work with CARB and the community steering committee to complete the additional actions as defined in the Staff Report on pages 7 and 8 (these actions are listed below).

Reduction Strategies

The Plan includes an extensive set of emissions and exposure reduction strategies, which are generally responsive to community concerns and recommendations. However, the proposed strategies are generally high-level, and the community steering committee recognized that prioritization and further definition of these strategies was a critical next step. To help clarify and refine the list of strategies, staff recommends that CARB staff, BAAQMD, and the community steering committee work together to undertake the following actions during the early phase of the Plan implementation process:

- Board-Directed Action #1: Prioritize the strategies and further study measures and develop an implementation plan for the highest priority strategies.

⁴ CARB Board Resolution 19-29, available at: <https://ww2.arb.ca.gov/board-resolutions-2019> and CARB document “West Oakland, Community Emissions Reduction Program Staff Report” released November 14, 2019, available at: <https://ww2.arb.ca.gov/resources/documents/west-oakland-community-emissions-reduction-program-staff-report>.

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

The Steering Committee's Subcommittees worked to reach consensus on the Type and Level of Effort they wished to invest in the different Partner Strategies, based on a continuum of effort that can be summarized as:

Stay informed: "Let me know about upcoming meetings and any decisions that are being made"

Be consulted: "I will listen to presentations and read materials and share any concerns or thoughts"

Get involved: "I will engage in discussions and I am willing to spend more time, attend meetings, and share information with others"

Actively participate: "I will actively spread the word, participate in additional meetings, write letters and emails, and talk to friends and neighbors"

Drive the decision: "I will take ownership and responsibility, plan and hold meetings, develop content, and seek consensus decisions"

As a result, the Subcommittees identified the following strategies as those they are enthusiastic to work on. The Subcommittees will recommend these strategies to the Steering Committee as the prioritizes for the next year of implementation:

Health and Living Buffer Subcommittee:

- Implement Citywide urban canopy plan (#10)
- Knowledge sharing about green buffer care (#11, #16)
- Increasing health programs presence in the neighborhood (#76)
- Limiting community members' cumulative exposure (#82)

Land Use Subcommittee:

- Reducing the pollution burden caused by industrial businesses near residential uses (#83)
- Relocate polluting businesses to suitable locations (#4)
- Update city codes & ordinances to regulate truck-attracting businesses (#1, #4, #22)
- Preventing resident displacement (#25)
- Supporting local green businesses (#1)

Transit/Bike/Walk Subcommittee:

- Decreasing road dust through more frequent street sweeping (#59)
- Grand Avenue and other transit improvements (#45, #47)
- Implementation of West Oakland BART bicycle station (#55)

Port and Freight Subcommittee

- Permanent truck parking in Port area (#26)
- Support for policies and incentives supporting zero-emissions trucks (#19, #37)
- Implementation of West Oakland Truck Management Plan (#38, #39)

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

Please see the attached Annual Progress Report Data Collection Template sheet “5. District Strategies” column F, which identifies the strategies that the Subcommittees note need further clarification and development.

- Board-Directed Action #2: Identify the strategies that require commitments from other agencies to implement and include engagement mechanisms with other agencies.

Please see the attached Annual Progress Report Data Collection Template sheet “5. District Strategies” column AB for a list of partner agencies needed to implement each strategy and column AC for information about work completed by the partner agency to date. Column AB includes agencies that require engagement, support and sometimes adoption and implementation of each strategy. The engagement mechanism is through Steering Committee and Subcommittee involvement and is also reflected on the Annual Progress Report Data Collection Template sheet “6. District Metrics” with 86 meetings between the Air District and agency partners since plan adoption.

- Board-Directed Action #3: Consider and discuss potential strategies to reduce impacts from new or modified sources in the community.

Many of the Plan’s strategies strive to review the impacts of new or modified sources in the community, see Board-Directed Action #1 above for examples. For a complete list please see the attached Annual Progress Report Data Collection Template sheet “5. District Strategies” column D.

- Board-Directed Action #4: Discuss prioritizing potential project types for incentive funding, including stationary sources, and an identification of funding sources for incentive-based and other strategies, including AB 617 incentive funds.

Please see response to Board-Directed Action #1 above. These strategies point to the projects that the Subcommittees have prioritized for funding sources.

- Board-Directed Action #5: Provide annual updates on opportunities to expedite implementation of air district regulations, including reducing emissions and risk from magnet sources.

The Air District has carefully considered the rule making schedule and opportunities to expedite implementation. See the current implementation schedule below for Air District regulations that are referenced in Owing Our Air.

Regulation	Schedule
Reg 5: Open Burning	Amendment development begins post 2020.
Reg 6-3: Woodburning	Amendment development begins post 2020.
Reg 6-4: Metal Recycling and Shredding Operations	Amendment development begins post 2020.

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

Reg 8-5: Organic Liquid Storage Tanks	Releasing Draft Amendments by the end of 2020, so any adoption would be in 2021.
Reg 12-13: Foundry and Forging Operations	Amendment development begins post 2020.

Tracking Progress and Ensuring Effective Enforcement

Tracking progress and effective enforcement are key to successful implementation of any community emissions reduction program. The Plan includes a discussion of metrics to track progress and an enforcement plan. The example metrics included are appropriate for discussion but high-level. Without specific progress metrics for the identified strategies, it will be difficult for BAAQMD, the community steering committee, and other partners to evaluate progress over time. Staff recommends that CARB staff, BAAQMD, and the community steering committee work together to undertake the following action as part of implementing the Plan and reporting on progress to better enable the community steering committee, CARB, BAAQMD, and the public to evaluate Plan effectiveness over time:

- Board-Directed Action #6: Develop metrics to track progress that:
 - are clear and action-based;
 - use the “examples of potential tracking metrics” in the Plan as a starting place;
 - identify data sources and tracking frequency; and
 - track progress at sensitive receptors across West Oakland.

The Air District continues to work with the West Oakland Steering Committee and CARB staff to improve our emissions inventory methodology, identify needs for updating the community-scale inventory, and refine air quality modeling results for key emissions sources. For example, in the Plan, emission estimates for ocean-going vessel (OGV) berthing were provided by CARB and were consistent with analyses conducted for CARB’s draft At Berth Regulation, with an assumed implementation year of 2021. In August 2020, CARB officially adopted the OGV At Berth Regulation with implementation beginning in 2023, which may require OGV at berth emissions to be updated for analysis year 2024 in the Plan. Other emissions sources are under review to identify potential changes needed to the West Oakland community-scale emissions inventory. The Air District will consult with the Steering Committee and collaborate with CARB to develop a timeline and approach for incorporating these changes in future annual reports.

- Board-Directed Action #7: Provide a list of which strategies in the Plan will provide quantifiable emissions or exposure reductions that would contribute towards achieving the Plan’s emissions reduction and equity-based targets, and which pollutants they are designed to reduce.

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

The Co-leads are developing a methodology to estimate quantifiable emissions and exposure reductions. Please see the attached Annual Progress Report Data Collection Template sheet “4. CARB Incentives” and “6. District Metrics” for a summary of emission reductions estimated from incentive programs which are reflective of the strategies.

The Steering Committee and Subcommittees are in the process of evaluating strategies for equity outcomes.

- Board-Directed Action #8: Provide a three-year inspection history for permitted stationary sources in West Oakland to complement information on complaints and notices of violation that are currently contained in the Plan.

Please see Attachment 1 below.

Please also see the attached Annual Progress Report Data Collection Template sheet “6. District Metrics” regarding meetings, inspection actions, funds spent, and emission reductions.

Technical Foundation

The Plan uses a community-scale air quality dispersion model to estimate local source contributions to PM_{2.5} and DPM concentrations, as well as cancer risk from carcinogenic TACs in West Oakland. CARB recognizes the value of looking beyond emissions inventories to understand where air pollution impacts people in the community. Given the technical complexity and associated computational demands, modeling work must complement robust emissions inventory and monitoring data. For example, BAAQMD has indicated that they did not have adequate time to incorporate certain emissions sources and pollutants into the air quality model. To help characterize air quality in West Oakland and support tracking progress, staff recommends BAAQMD undertake the following work and share this information with the community steering committee as part of Plan implementation:

- Board-Directed Action #9: Work with CARB to complete and analyze the emissions inventory to illustrate source attribution in the community.

Please see response to Board-Directed Action #6

- Board-Directed Action #10: Develop a clear timeline and approach to incorporate all emissions sources and pollutants present in West Oakland into the community-scale air quality model.

The Air District will continue to consult with the Steering Committee and collaborate with CARB to confirm timeline and to develop an approach for incorporating additional emission sources and pollutants into the West Oakland emissions inventory and future annual reports.

Additional actions from CARB Board Resolution 19-29 are listed below:

- Board-Directed Action #11: The Board directs the District to submit annual reports to CARB by October 1 of each year beginning in 2020, developed in accordance with the Blueprint requirements and including updates on the

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUALITATIVE progress assessment and status updates for interim milestones identified by the CARB Governing Board

implementation of the Plan and the additional actions required by this resolution.

The public [Annual Report](#) is available on the Air District [webpage](#). Two annual report videos are also on the [webpage](#).

- Board-Directed Action #12: The Board directs CARB staff to develop a community-scale emissions inventory for West Oakland, in collaboration with the District, to support tracking progress and statewide comparisons.

[NOTE: CARB staff will complete this section]

- Board-Directed Action #13: The Board directs CARB staff and the District to continue to partner and engage with the City of Oakland, the Port of Oakland, and other agencies on plans, activities, or projects that may be relevant to the West Oakland community's air quality challenges, including the Port's Seaport Air Quality 2020 and Beyond Plan, the City and Port's West Oakland Truck Management Plan, and City of Oakland General Plan updates.

Please see the attached Annual Progress Report Data Collection Template sheet "5. District Strategies" columns F, AB, AC, and AI. Also see Template sheet "6. District Metrics" which documents meetings by Strategy. We estimate that we have participated in approximately 50 inter-agency meetings since Plan adoption in October 2019.

Section A: QUANTITATIVE Summary of progress for the community emissions reduction program

- 5) Status of the Strategies Included in the Program – Summarize the total number of strategies that have been fully implemented, the number that are in progress, and the number that have not yet begun implementation.

[Ref. Blueprint pages C-38, C-39. West Oakland Action Plan, Section 4.4]

Please see the response to Question 1 "Implementation Schedule" above. Please see attached Annual Progress Report Data Collection Template sheet "5. District Strategies" columns G through J for specific strategies.

- 6) Completion of Required Elements – Describe completion of required elements (e.g., emissions reduction targets, milestones for compliance goals, etc.). Some required elements are provided below in 6a, 6b, and 6c.

[Ref. Blueprint pages C-3, C-4, C-38, C-40.]

Section A: QUANTITATIVE Summary of progress for the community emissions reduction program

6a) Emission Reduction Targets – Summarize progress toward achieving overall emission reduction targets (PM2.5, PM10, DPM, NOX, and VOC, as applicable). *[Ref. Blueprint pages C-16 to C-19, C-38, C-40. West Oakland Action Plan, pages 6-8 to 6-12, Table 6-1; pages 6-18 to 6-20, Table 6-3; page 8-2]*

West Oakland Action Plan Emissions Reduction Targets (tons/year in 2024):

- Diesel PM = 2.40 tpy (Table 6-1);
- PM2.5 = 3.71 tpy (Table 6-3)
- Cancer-risk weighted toxics = 2337 tpy (Table 6-2)

The Air District estimates that through incentive programs, the following emission reductions have been achieved:

Pollutant	Reduction Target (tons/year)	Incentive Reduction Estimates (tons/year)
Diesel PM (1)	2.40	0.91
PM2.5 (2)	3.71	0.87
Cancer-risk weighted toxics (2)	2337	719

1. Source: Annual Progress Report Data Collection Template Sheet “6. District Metrics”

2. Source: BAAQMD calculations

Please see the attached Annual Progress Report Data Collection Template sheet “4. CARB Incentives” and “6. District Metrics” for more information on emission reductions.

6b) Proximity-Based Goals - Summarize progress toward achieving proximity-based goals (e.g., measures addressing conflicting land uses, relocating truck routes, planting trees and other vegetative barriers, installing high efficiency air filtration). *[Ref. Blueprint pages C-19, C-20. West Oakland Action Plan, page 4-6]*

The Steering Committee and Subcommittees have prioritized strategies that address proximity-based goals (see response to “Board-Directed Action #1 above). The Land Use Subcommittee and the Health/Living Buffer Subcommittee have worked to collect data to address these issues. This work is reflected in both the Annual Progress Report Data Collection Template sheet “5. District Strategies” and “6. District Metrics”.

6c) Compliance Goals - Provide an update on progress toward achieving compliance goals and improving compliance (e.g., summarize non-compliance rates and other key compliance statistics). *[Ref. Blueprint page C-31. West Oakland Action Plan, pages 7-17 to 7-19]*

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section A: QUANTITATIVE Summary of progress for the community emissions reduction program

Please see response to Question #1 “Enforcement” above and the attached Annual Progress Report Data Collection Template sheet “5. District Strategies” rows 102-107 for updates on the enforcement strategies.

- 7) Plan Goal and Targets – In addition to the required emissions reduction targets, the Plan establishes the goals and targets shown below. Summarize reduction in local concentrations of PM2.5, diesel PM, and cancer risk in seven impact zones. *[Ref. West Oakland Plan, pages 4-5 to 4-7, Figure 4-4, page 8-2, Table 8-1]*

	2025 TARGET All neighborhoods experience West Oakland’s average air quality	2030 TARGET All neighborhoods experience West Oakland’s best air quality
Diesel PM	<0.25 µg/m3	<0.13 µg/m3
PM2.5	<1.7 µg/m3	<1.2 µg/m3
Cancer Risk	<200 in a million	<110 in a million

Please see answer to Item #6 above for estimated emission reductions in West Oakland.

Air District staff continues to work with CARB staff to update the inventory and will develop a schedule for reporting progress toward targets, per consultation with the Steering Committee members, in future annual reports (e.g., every two to three years from 2022).

- 8) Tracking Health Conditions – The Plan states that health conditions in West Oakland will be compiled and reported on a periodic basis (e.g., data on asthma emergency visits, asthma hospitalization, and cancer, heart disease, and stroke death rates). *[Ref. West Oakland Action Plan, page 8-3]*

Air District staff will work with Alameda County Public Health Department to compile and report health data on a periodic basis, as new health data becomes available.

- 9) Incentives Investments - Summarize the total incentives investments for programs that are identified in the community emissions reduction program or for other projects that provide air quality benefits within the community.

For a summary of Air District incentives that are estimated to benefit the West Oakland community, please see the attached Annual Progress Report Data Collection Template sheet “6. District Metrics”. No other information is available at this time.

**AB 617 Annual Progress Report:
Data Collection Template for BAAQMD – West Oakland**

Section B: Status update for EACH STRATEGY in the community emissions reduction program

Please fill in the attached spreadsheet template and provide an update on the status and specific metrics for EACH STRATEGY. [Ref. Blueprint, page C-39]

Please see the attached Annual Progress Report Data Collection Template sheet “5. District Strategies” and “6. District Metrics”.

**Attachment 1
LIST OF VIOLATIONS ISSUED IN WEST OAKLAND (JANUARY 2018 – AUGUST 2020)**

NOV Number	Regulation	Type	Date Issued	Site	Address	City	Zip	Status
