Alternative Diesel Fuels Regulation

Reporting Summary – 2022

The Alternative Diesel Fuels (ADF) regulation, which became effective January 1, 2016, requires regulated parties to report produced, imported, and blended amounts of all biodiesel blendstock and the biodiesel blends produced. The table below is a summary of ADF reporting in 2022 and shows the volumes of B100/B99 blendstock imported and produced, as well as the percentages of B100/B99 blendstock blended to produce final blends of B20 and below.

Alternative Diesel Fuels Reporting Summary 2022

	Total B100/B99 Volume Imported/Produced	Percentage of B100/B99 blended to produce B5	Percentage of B100/B99 blended to produce B10	Percentage of B100/B99 blended to produce B15	Percentage of B100/B99 blended to produce B20
2022 Q1	56,564,346	41.2%	2.3%	8.0%	48.6%
2022 Q2	54,379,806	40.6%	2.0%	6.4%	51.0%
2022 Q3	59,616,848	39.2%	1.7%	8.5%	50.5%
2022 Q4	60,462,111	39.5%	2.0%	14.8%	43.8%
Total	231,023,111	40.1%	2.0%	9.3%	48.6%
